

Your student will be academically challenged at the high school in many ways. Demonstrations of skills and learning may require any combination of labs, tests, homework, projects, and writing; each class will be different. Students are encouraged to always be prepared with paper, pens, pencils, and organized folders for each of their classes. Classes that require additional supplies will be discussed with students in the first days of class. A fee may be charged for courses during which students will leave the course with projects that are of an equal (or greater) dollar amount to the class fee. The THS Library has materials available for most projects. For students who might find themselves in times of need, the THS Pantry is available for all students *free of charge* for school supplies (food, clothes, and toiletries are also available). Please reach out directly to teachers for specific items that may be requested, or give the THS Front Office a call with any questions. Go Colts!
