

Set up your child for success!

Tips for setting up a learning space at home

Families, we understand that you might be juggling multiple students in multiple classes in a small space. Be creative, and do your best!

1. Find a spot that is quiet, without distractions, and separated from other siblings. Consider headphones.
2. Make the space comfortable, but not too comfortable (NOT in bed).
3. They'll need a desk or a table they can write on, and good lighting.
4. Make their supplies available close by. Use a bin or a bag so they can have their own things.
5. Let them personalize the space if you can, and help them create a schedule.
